

F6 — Wind field and the C2 attribution, Melbourne-Essendon Fields

AUS_VIC_Melbourne-Essendon.Fields.958660_TMYx.2011-2025 · 8,760 rows · 0 missing wind values · screened by tools/diagnostics/weather_integrity.py

Panels 1-4 characterise the station record (results/paper/wind_profile/wind_stats_station.json + the committed EPW, cross-checked); panels 5-6 are the correlation, which is driven by the wind LOCAL to the wall (wind_stats_terrain.json).
